PROJECTS

Store Management System in C++ language

I had done a project on C++ language on Store Management System. It includes frontstore and backstore.

Vehicle Classification System using Python and CNN

I have done a project with my project team on classifying the moving vehicles whether they are Car, Bus or Truck using Python and Convolution Neural Network(CNN).

Jiwan Kosh - A fund raising website

I, with my project team are doing project on a website to raise fund easily through the online platform in the context of Nepal as there are no any online site to raise fund.
